Extending Dassault Falcon aircraft capabilities with medevac configurations

Improve the profitability of your business jet's operations by utilizing its full potential. Extend your aircraft's mission capabilities with our customized medevac solutions for Dassault Falcon aircraft. You'll keep downtimes to a minimum with packages that are designed, sourced and installed by our engineering specialists.

Switch between passenger and medevac operations

Our highly skilled team offers several configurations that allow you to easily switch between VIP and medevac operations, according to your immediate needs. The downtime for the modification is kept to a minimum and can also be carried out during heavy maintenance visits. From designing the custom configuration, to helping you source appropriate and approved medical equipment, and to integrating and installing your preferred solution in your existing aircraft – you can rely on RUAG as your single point of contact for all your medevac configuration needs.

Maximizing your profit

Our medevac configuration solutions ensure you benefit across the board. Choose RUAG to help you expand your customer base by being ready for new business segments, and to enhance both your revenue potential and the value of your aircraft.

RUAG – the right medevac configuration partner for you
