

**Together  
ahead. RUAG**

## Newsflash

**Integrate the latest advances in cabin management systems during your next maintenance downtime, and profit twice over.**

Optimise your next inspection event. More and more, aircraft owners and operators are opting to combine our maintenance expertise with our selection of proven and advanced cabin management solutions. The RUAG one-stop shop ensures you have the flexibility to choose the solutions you want, according to the schedule you require. Book today to optimise your heavy maintenance inspections during Q3 and Q4 2017.

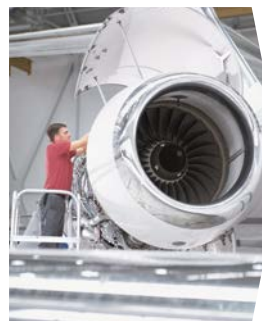

### Implement integrated cabin system connectivity

Ensure you can stay connected to your personal devices, stream your media, improve your well-being, and calibrate your cabin comfort zones. Enrich the passenger experience with tailored LED lighting, noise reduction, electronically dimmable window shades, home cinema screens, or digital media delivered straight to your devices.

### Authorised Service Centre expertise

Schedule your aircraft's requisite heavy maintenance inspection and you can opt to resolve outstanding warranty items, service bulletins, and OEM mandates, or create custom configurations. We are a trusted partner for Dassault Falcon business jets.
