A GLOBAL FIRST: missim – The only 4-in-1 tester for self-protection systems

# A GLOBAL FIRST

## missim – The only 4-in-1 tester for self-protection systems

Ensure safety. Test the readiness of your self-protection system's sensors with missim – RUAG Aviation's proven all-in-one solution, and the only sensor tester in the world covering 4 threat simulations in one convenient package:

- Radar
- Missile
- Laser
- **NEW Hostile Fire Indication (HFI)**

### System independent

Nearly all existing systems can be tested with missim – whether in the air, on the ground or on water. Innovated and delivered by RUAG Aviation, proven through **active use by many customers worldwide.**

### Personalise your missim!

missim is extremely flexible, and available in any combination of the 4 emitter classes: **choose from 1-in-1, 2-in-1, 3-in-1 and even 4-in-1 options**, with upgrades available anytime. Cost-effective, convenient and easy: missim is the full package.

### Wired remote control

Up to 8 missim can be accessed and steered from a single PC, allowing serial tests to be conducted via secure dedicated USB cables. What's more? Only one company software license is needed for all your missim units.

### A complete solution

RUAG Aviation offers everything needed to test your entire self-protection system: **missim for effective sensor testing and CAST-easy, an electronic flare simulator** for testing your chaff and flare cartridges.
