

# PT6A Engine Accessories: Fuel Nozzles

The efficient performance of your turbines begins with the effectiveness of its components. Ensure maximum availability and performance with RUAG Aviation's reliable solutions for PT6A fuel nozzles.

## Description

A comprehensive portfolio of capabilities for the maintenance, repair, overhaul, cleaning and testing of Pratt & Whitney PT6A fuel nozzles.

The fuel nozzles undergo ultrasonic cleaning by RUAG Aviation, while damaged parts are repaired or replaced as necessary. Once re-certified, your fuel nozzles are returned within a few days.

## Maximum availability

A fuel nozzle kit exchange programme is available, comprising a complete set of recertified nozzles for specific Pratt & Whitney turbines including a gasket kit. If required, same day shipping can be provided to ensure the best possible availability for your aircraft.

## Various nozzles supported

In addition to the PT6A, RUAG Aviation's test benches further support fuel nozzles for Pratt & Whitney PT6C, PW100 and PW200 turbines.

## Your benefits

### Maximum availability:

- On-time delivery (OTD)
- Competitive turnaround time (TAT)
- Fuel nozzle kit exchange programme with same day shipping for PT6A-27 and PT6A-67B

### Cost-efficiency:

- Benchmark prices
- Accurate cost evaluation

### Maximum reliability:

- State-of-the-art fuel nozzle test stand
- Detailed work report and test report
- MRO performed according to OEM specifications
- Option for OEM or PMA parts

### Maximum convenience:

- One-stop shop
- Dedicated customer service
- Continuous work progress reporting
