

LOVING YOUR JET

Smiles are free

Why did you become an Avionics Engineer (A.E.)?

I love technology, modifications and seeing creations come to life.

What are you passionate about?

Raising my 2-year-old daughter and fixing up my 1991 Honda CRX. And, whether I am at home or at work, dedication, persistence and collaboration are absolutely essential to my approach and to my philosophy on life.

What can challenge you on a project?

Tensions can get high when multiple teams collaborate in the same space. For instance, right now we are modifying a super cool entertainment system that requires collaboration from 4 A.E.s, mechanical engineers and metal workers. We are all in the aircraft at the same time!

How do you meet the challenge?

Just like I would do at home. I kick start a positive atmosphere by putting a big smile on my face! Smiles are free, I say! And if we do things right, we get the smile back and that feels great.

Flavien Gautier, Avionics Engineer IERA, B1/B2 Dassault, RUAG Aviation Geneva

Home	Cruseilles, France
Hobbies	Skiing, snowboarding, biking, electric guitar
Passion	Raising his daughter and working on his 1991 Honda CRX
Motto	Keep the respect and smiles are free!

Together ahead. **RUAG**
