Special painting offer

Special painting offer including free teflon coating and three free design proposals!

RUAG presents you with a very special offer. Order our painting services during EBACE and receive a free teflon coating, which acts as an ideal sealant for your new paint job. In addition, we will create three 3D design proposals for free.

Teflon coating

Order by the end of May this year and your brand new paint job will receive a teflon coating free of charge. This acts as an excellent sealant, is UV-resistant and helps resist fuel vapor. In addition, the paint gloss will last longer and your aircraft will be easier to clean and maintain.

3D Design proposals

We will create three design proposals, in 3D, as an interactive paint scheme, and we will also provide you with a technical drawing – all absolutely free.

To take advantage of this offer, order painting services by 31 May 2014.

Please contact us for more information.
