

Newsflash

RUAG Aviation has accomplished the status of a Hartzell Recommended Service Facility

RUAG Aviation in Lodrino, Switzerland is the competence centre for propeller aircraft within RUAG.

Broad range of Hartzell Propeller applications

RUAG Aviation in Lodrino, an EASA & FAA approved repair station, is already appointed Service Center by the aircraft OEMs Cirrus, Cessna (Textron), Piper and Mooney Aircraft, all equipped with state of the art Hartzell propellers. Furthermore we have full MRO capabilities on Cessna Caravan, King Air, Piaggio P180 and Pilatus PC-series, as well equipped with the world class Hartzell Propellers.

Send your propellers to RUAG Aviation in Lodrino

We overhaul Hartzell propellers since years and feel greatly honoured to be awarded with the Hartzell RSF (Recommended Service Facility) status. The synergies between the aircraft OEMs and Hartzell are obvious, our overall OEM relationship strengthens our market position significantly.

Together ahead

With our OEM partners we go together ahead towards the future providing world class service to our common worldwide customer network.

Contact christian.pelossi@ruag.com, our designated Product Manager. He will be at your full service for any Hartzell MRO requirement you might have.

For any further information about our services for propeller aircraft please refer to our website www.ruag.com/propeller
