Newsflash: Polarised window shades for your preferred natural lighting

## Newsflash

### Polarised window shades for your preferred natural lighting

**Cutting-edge polarised window shades with no moving parts, able to turn your windows dark in an instant. Convenient, effective and efficient; designed for Dassault Falcon 50, 900, 2000 and 7X – delivered by RUAG Aviation.**

#### What is it?

In less than 5 seconds, your windows can go **from bright to dim and anywhere in between**. Precise controls and preset configurations place your preferred window tint right **at your fingertips**.

#### Easy installation

Turnaround time is minimal thanks to the all-in-one integrated electronics. No modifications of existing aircraft electrical systems, no modifications to your CMS, no moving parts.

And even better – this **EASA-certified solution** is lighter and **improves fuel efficiency**.

For further information, please get in touch with us.

#### FREE window panel upholstery

**with purchase of this new polarised window shade system before 31 August 2014.**

Terms and conditions apply.
