

## Newsflash

**Make the most of your next C-check. Plan with our maintenance and engineering specialists for individualised services and reliable downtimes.**

**“Your next C-check and heavy maintenance visit will be your latest success story – for your aircraft, for your scheduled operations, for your budget, and even for your customer base. Think long-standing EASA-approved engineering and maintenance expertise, reliable aircraft availability, and then envision more. Our one-stop shop optimises your downtime with value-adding aircraft solutions, using the right tools for every need, just like your trusted pocketknife.”**

David Ricklin, General Manager Site Geneva, RUAG Aviation

### Save on costs and time, quality remains constant

Practically speaking, planning your C-check and heavy maintenance visit at our one-stop shop allows you to manage services according to your operational goals and bottom line expectations. Fulfil all airworthiness requirements, include the latest service bulletins and compliance mandates, and then create cost efficiencies by choosing additional solutions for upgrading the passenger experience during the same downtime. Select refurbishments, upgrades, and modifications while our dedicated maintenance and engineering team ensure transparent processes and regular communication for keeping your project on track.

### Consolidate effort, optimise downtime

As proven specialists in engineering as well as maintenance, our team offers you more. Your decision to combine your C-check with more services is all part of our one-stop shop approach. Cosmetic repairs or even full refurbishment – replacing worn carpeting, resurfacing wood veneers, restyling the cabin interior – installing a new IFE multimedia lounge, upgrading avionics, or implementing OLED or LED lighting all become streamlined tasks. Even aircraft painting – partial or full – can be completed during the same C-check downtime, eliminating the need for additional downtimes and the resulting impact on operations and revenue.

Contact our heavy maintenance specialists and add value to your next C-check. We'll keep your aircraft flying profitably.
