

Landing Gear Services Maintenance, Repair & Overhaul

Secure flight safety and maximise the availability of your landing gear with RUAG Aviation's reliable MRO services. Customer oriented, on time and affordable, RUAG thoroughly understands customer needs and ensures satisfaction and economical aircraft operation. You can rely on highest quality, full transparency and comprehensive supply chain services.

Capabilities

RUAG Aviation delivers comprehensive landing gear MRO solutions from a single source. These services ensure the safety and performance of landing gear, and encompass:

- Comprehensive capabilities in MRO of landing gears and subcomponents with in-house landing gear MRO shops
- Brakes, wheels and rims
- Hydraulic components such as steering cylinder and pumps
- Enhanced non-destructive testing (NDT) inspection

All landing gear subsystems are tested on specially designed test benches, ensuring the highest standard of efficiency, safety and reliability is attained.
