

Newsflash

Simultaneous C-checks in Six Weeks – Dassault Falcon Aircraft

Focusing on your needs, 24 hours a day, 7 days a week, is a guiding principle driving our commitment to our customers. Our specialists recently dedicated 2500 working hours to complete 2 Dassault Falcon C-checks in just under 6 weeks – and both at the same time. Time-saving and cost efficient, RUAG is able to fulfil the guarantee of precision and availability.

Shared Capacity, Shared Savings

Timing is everything, and your schedule is important to us. Two Dassault Falcons, a Falcon 2000 Classic, belonging to a VIP customer, and a Falcon 900B, a government-operated aircraft, commanded equally prominent positions in our maintenance facilities and the dedication of our team of professionals. The introduction of a double shift system reduced the required downtime and contributed to the overall cost efficiency of both projects.

Transparency for Timely Completion

Transparency and open communication with our customers is paramount to a successful completion and intrinsic to our partnership approach. Daily conference calls and regular site visits are the order of the day and prove crucial to aircraft availability.

One-Stop Shop

You can go about your business while we take care of your aircraft. Our one-stop shop solutions allow us to perform all required services within one single downtime, adapted to suit your individual schedule – effecting faster turnaround times and maximizing your profit options. RUAG’s one-stop shop solutions include MRO, cabin interiors, painting, system upgrades, FBO, and support and consulting.
