

Newsflash

Increase your aircraft availability with our landing gear loaner and exchange service for Piaggio Avanti family

Reliable take-offs and landings are fundamental to all successful operations. Regular servicing and maintenance of the system, including overhaul, is therefore a key element of keeping your P180 Avanti or P180 Avanti II aircraft airworthy, ensuring maximum safety of your operations.

Loaner and exchange landing gear while yours is in service

The RUAG Aviation landing gear loaner and exchange service keeps your downtimes as short as possible. Take advantage of our loaner landing gear while yours is overhauled, or choose to exchange your maintenance-due landing gear for one of our certified and installation-ready systems. The RUAG Aviation loaner and exchange service saves you money by reducing aircraft downtime.

Upgrade to latest generation landing gear

Besides servicing your existing landing gear, we can also upgrade your aircraft with the latest Magnaghi Aeronautica landing gear – and this to very attractive conditions. The new Magnaghi landing gear is the same system fitted to the P180 EVO, the latest generation P180 aircraft from Piaggio. It incorporates a digitally controlled steering system, which improves ground handling and reduces pilot workload. Maintenance is also reduced, thanks to a 10000-cycle/15-year overhaul interval. This means fewer downtimes and long-term cost savings, with overhaul costs around 50 percent lower than those of the Safran system.

Your Piaggio Authorised Service Centre – since 2008

Rely on the expertise of RUAG Aviation's specialists in Lugano-Agno, Switzerland, to get your Piaggio P180 back in the air quickly and with minimum downtime. The RUAG one-stop shop in Lugano-Agno offers a comprehensive range of services for the Piaggio P180, serving customers all over the world. RUAG one-stop shop solutions are available from a single source and include aircraft MRO, inspections on PT6A-66/6B engines, component overhaul, cabin interiors, aircraft painting, system upgrades, component services, AOG, FBO, and support and consulting. As an official Hartzell Recommended Service Facility, RUAG can also take care of propeller overhaul on your Piaggio.
