

Reliable technology partner to the  
Swiss Air Force – since 1915.

Together  
ahead. **RUAG**

# RUAG Life Cycle Management – end-to-end support for air defense systems

Ensuring availability – Boosting performance – Extending service life

# Our projects – a success story

**Final assembly of the F/A-18, F-5, Super Puma, EC-635**  
Full build-up of maintenance and upgrade capabilities prior to aircraft delivery

**Upper Cockpit Longeron (UCL) exchange on the F-5**  
Replacement of highly stressed structural components enabled the fleet to continue operations

**PC-6 upgrade (NCPC-6)**  
Replacement of analog devices with electronic instrumentation and central displays

**F/A-18 structural refurbishment programs**  
Installation of more powerful and robust structural components to extend the platform's service life (from 5000 to 6000 flight hours)

**Replacement for FLIR Thermo-CAMs on the Super Puma**  
Superior infrared camera upgrade greatly boosted performance

**Super Puma/Cougar upgrade (WE89 & WE98)**  
Modernization of various systems restores the Cougar TH98 to a good-as-new condition

**F/A-18 upgrade programs**  
Modernization of various instrumentation to ensure state-of-the-art system capabilities

**Operations extension program for F-5E/F to extend beyond scheduled decommissioning**  
Additional personnel from the global business were called on at short notice to handle the large number of inspections required
