

LOVING YOUR JET

Satisfaction and rapport

What is your job at RUAG?

Ensuring safety and functionality of Bombardier Challenger and Global aircraft and all their parts.

What do you enjoy the most about your job?

Aircraft engines are fascinating. I love carefully working through their technical complexity.

How do you create a balance between your work and your free time?

I love working on my motorcycle. I need to be just as careful and deliberate as I am at work. A safe motorcycle makes for a great ride.

What aspect of your job is the most challenging?

Finding the unexpected, troubleshooting it and then repairing it, while still delivering the aircraft on time and in airworthy condition.

How do you meet the challenge?

By working together, in harmony with my team. When we recognize our strengths, we can be quick to meet each challenge.

What experiences satisfy you at the end of a work day?

When we work closely with our customers and then, after a time, some customers become my good friends!

Niko Leder, Aircraft Mechanic, RUAG, Munich-Oberpfaffenhofen, Germany

Hobbies: Motorcycling, snowboarding and traveling
Passion: Staying balanced
Weekend time: Motorcycle riding with my dad
Motto: Life is a ride!

Together
ahead. **RUAG**
