

**Together
ahead. RUAG**

Newsflash

Benefit from short turnaround times at the refurbished TPE 331 engine shop in Stans, Switzerland.

Your Honeywell TPE331 engines provide the momentum your aircraft and your business need. Regular maintenance keeps your engines in peak condition, ensuring maximum reliability and optimised asset value. Rely on the experts at our upgraded TPE331 engine shop to provide the specific support you require. Lean principles reinforce our focus on increased efficiency and prompt service.

Honeywell Authorised Mechanical Service Centre

Maintaining your TPE331 engines is now made more convenient thanks to the upgraded and enhanced TPE331 engine shop at RUAG Aviation in Stans. Reopened on 25 January 2017, the workshop has been completely refitted with new workstations and is dedicated to operating according to lean principles. Customers benefit from even greater levels of efficiency, service and ensured engine availability.

Tailored solutions for maximum availability

The TPE331 engine shop in Stans continues to prove extensive expertise in both scheduled and unscheduled engine services, including heavy maintenance and overhaul, periodic inspections, and field support services. Solutions are tailored to support your specific requirements, featuring the services you need to continue successful operations – from rental engines during the maintenance event, to an Engine Maintenance Cost Plan for future budgeting.

Contact us to experience convenience and prompt availability for your TPE331 engine needs.
