Newsflash

Experience fast and direct Gulfstream aircraft components maintenance at the approved Repair Station at RUAG in Munich

Your next Gulfstream component maintenance event will save you time and money. Our Approval of Supplier status for EASA C-rated components, including life rafts, brings reliable and expert support to Central Europe. You benefit from highest quality services, a closer location, easier logistics, and guaranteed 3-day availability.

Approval of Supplier

Improved access to Gulfstream materials, parts and services is now confirmed. The Gulfstream Approval of Supplier certificate is your assurance that the c-rated components on your Gulfstream are accurately maintained. Our precision expertise ensures your aircraft will be available when you need it.

Central European location

Save time and money on the logistics associated with your life raft and other c-rated component maintenance requirements. Our Munich location is closer to where you are. You experience easy access to the services your Gulfstream components require for your aircraft's continued airworthiness.

Your aircraft, your schedule

Full c-rated component maintenance, repair, inspection, and testing, are guaranteed within 3 days. You benefit from the highest standards of quality, OEM compliance, and full EASA and FAA certification.

One-stop shop aircraft solutions

Rely on the RUAG team of experts for MRO, testing, recoding, modification, readout, and evaluation services for almost any EASA c-rated aircraft component. You enjoy full aircraft services and one-stop shop solutions according to your individual requirements. Your single source service provider, we offer heavy maintenance inspections, line and base maintenance, cabin interior modifications and restyling, aircraft painting, system upgrades, FBO, AOG, and support and consulting services for selected business jets.
