

**Smart, convenient and safe.  
Clip your iPad Mini into your Dornier 228 cockpit,  
just like the Italian Army.**

**The Italian Army is flying with more up-to-the-minute accuracy, while keeping paper to an organized minimum. They've just installed our dual-purpose iPad Mini mount and clipboard in the first of their three Dornier 228 aircraft.**

**Equipped for two-for-one functionality**

The space-saving mount does double-duty as an iPad Mini docking station, ensuring you, as well as the Italian Army pilots, have all the information needed for secure and efficient missions and operations.

- Just flip the mount to switch between functions:
- the clipboard function has built-in LED lighting
  - your iPad mini is kept at the ready with USB charging

**Effective performance – right at your fingertips**

Our iPad Mini mount is designed to perform reliably, withstanding demanding operational conditions. We balanced your need for hands-free access to operational information with our proven engineering insights to design, develop and approve this robust and ergonomically sound solution. Your cockpit remains streamlined and secure.

Take flight with your iPad Mini. Contact us to order your cockpit mount today.

iPad mini is a trademark of Apple Inc.
