

LOVING YOUR JET

Making time to save time

Why did you become an Aircraft Engineer (A.E.)?

I love the challenge of pitting my technical expertise against the clock. My job is awesome. Every day I have the challenge of getting an aircraft back up and flying as quickly as possible.

What are you passionate about?

I am passionate about my dogs! We cherish our two Bernese Mountain Dogs, adopted from the SPA in France. And, I appreciate beautiful landscapes. That's another reason I'm keen to travel for AOGs – it combines my professional passion with my love of experiencing new environments.

What can challenge you on a project?

The customer always needs help quickly when an AOG occurs. Collectively, my team and I have amassed the experience to successfully meet these challenges where time is always a priority.

How do you meet the challenge?

Every AOG is different and the clock is ticking. My goal is to be fast and then get home safely. I always have a tool box ready to go, complete with all the documentation I need. Most importantly, my team supports me.

What satisfies you the most at the end of the day?

After finishing a project successfully and on time, I look forward to spending the rest of the day with my wife and our dogs.
