

LOVING YOUR JET

Disassemble, reassemble, and ready to go!

What is your job at RUAG?

CAT A Mechanic for base maintenance on Bombardier Challenger and Global series jets.

What do you enjoy the most about your job?

I love working with my hands. I love how an entire team can collaborate on an aircraft, just like a sailing crew operates on a boat.

What aspect of your job is the most challenging?

Aircraft, also like boats, need repair - and they need it done right and they need it done quickly.

How do you meet the challenge?

Teamwork. A great team collaborates well, even under stress, to beat the challenge, be on time and resolve the issues perfectly.

Why did you become an aircraft mechanic?

I always wanted to do good work with my own hands. One time, I had an internship with an aircraft mechanic and that experience stayed in my head until it was time to decide.

Andi Krembs, Aircraft Mechanic, RUAG, Munich-Oberpfaffenhofen, Germany

Hobbies: Sailing, surfing and traveling with my girlfriend
Passion: Working with my hands
Motto: Hang loose!

Together
ahead. **RUAG**
