

Newsflash

Faster reaction times and stable pricing – our new, published price list for Dornier 228 OEM spare parts ensures you have the answers upfront

Responsible care of your Dornier 228 requires a prompt and reliable response from your support network. RUAG is keen to become a key resource in that network. Our new OEM spare parts price list has been published and is attached here in this email so you enjoy direct access to the answers you need for continued and successful operations.

Faster reaction times

You work hard to keep your operations on budget and on schedule. We'd like to contribute to making your day-to-day easier, especially when it comes to the pricing of spare parts. That's our motivation behind providing you with this new spare parts price list. With the OEM facts at your fingertips, you and your maintenance team now have an advantage when it comes to making even more informed decisions on MRO, repairs, spare parts, and stock control.

Your community, our commitment to transparency

We are intent on improving our level of service to you and the Dornier 228 operator community. This new price list for Dornier 228 OEM spare parts is just one way of proving this commitment. Look to RUAG for swift response times, thorough OEM technical support, state-of-the-art technology development, and spare parts availability. RUAG is steadfast in this mission and to our renewed dedication to our responsibilities as the OEM of the Dornier 228.

Your Dornier 228 Customer Support Team looks forward to continuing our dialogue with you.
