

# Enhanced safety for PC-6 Porter

## with Avidyne's TAS605 Traffic Advisory System

The TAS605 is a dual antenna traffic advisory system, designed to enhance traffic awareness for pilots of mid-performance aircraft by providing visual and audible cues.

### Affordable Safety

This EASA-certified upgrade from RUAG Aviation provides PC-6 owners and operators with an inexpensive means to drastically increase flight safety.

“Traffic! One o'clock! High! Two miles.”

### Intuitive Alerting

Not only does the pilot receive visual cues on several displays and remote annunciators, but Avidyne's trademark real-time Heads-Up Audible Position Alert enables the pilot to concentrate on traffic outside the cockpit.

### Comprehensive Service

RUAG Aviation offers a full turnkey solution with minimal downtime, taking care of the entire integration as well as providing full after-market support. The system is already designed, assembled and EASA certified, and can be integrated into any PC-6.
